## PROJECT INFO

---

### 1 .Gymio

**Role :** Frontend Developer

**Technologies Used :** HTML , CSS , Java Script , Bootstrap , React.js

**Project Overview :** The Gym Management System Website is a robust and user-friendly web application designed to simplify and automate the daily operations of a gym. It features two primary panels — Admin Panel and User Panel, each with role-specific functionalities to ensure efficient management and enhanced user experience.

(1)Admin Panel – for gym staff and management to handle operations.

(2)User Panel – for members to access personal details, schedules, and fitness progress.

### 2 .Bziz

**Role :** Frontend Developer

**Technologies Used :** HTML , CSS , Java Script , Bootstrap , React.js

**Project Overview :** The Digital Visiting Card Website is a modern, interactive platform designed to replace traditional paper visiting cards. This project aims to help business owners present their contact and company information in a clean, professional, and easily accessible digital format. When potential clients or customers visit the website, they can view the business details and click a "Save" or "Download" button to store the contact information directly on their phone or computer for future reference. Download a stylized PDF version of the visiting card for record-keeping.
